# CUALIDADES UNDEFASA · UNDEFASA QUALITIES

Conoce las cualidades de los productos UNDEFASA · Know the qualities of UNDEFASA's products

## PORCELÁNICO 100% · 100% PORCELAIN

Nuestro porcelánicos tienen mucha menos absorción de agua: un 0.1% frente al 0.5% que marca la normativa ISO. Ello los hace mucho más resistentes frente a temperaturas extremas.

Our porcelain tiles have a much lower percentage of water absorption: 0.1% vs. 0.5% indicated in the ISO standards. This makes them much more resistant to extreme temperatures.

## PORCELÁNICO EXTRA HARD · PORCELAIN EXTRA HARD

Nuestros porcelánicos son más duros y resistentes a la rotura porque están elaborados con una base porcelánica de gran pureza y una severa y larga cocción a alta temperatura. Así conseguimos un coeficiente de 55 Nw/cm<sup>2</sup>, un 40% más elevado que la norma general. Si en la colocación del suelo existen los inevitables huecos sin material de agarre nuestro porcelánico le da una garantía. Los colocadores consultados coinciden en que cuesta de cortar, esto es debido a la mayor cocción que le da dureza.

Our porcelain tiles are harder and more resistant to breakage because they are produced with a porcelain support of high purity and a severe and long process in the kiln at high temperature. This way we get a coefficient of 55 Nw / cm<sup>2</sup>, 40% higher than the standard. If there are unavoidable gaps without glueing material during fixing, on the floor, our porcelain gives a guarantee. Professional fixers consulted agree that cutting it is not easy, this is due to increased hardness that is given by the longer firing process.

## EXTRA WHITE · EXTRABLACK

Nuestros blanco y negros de las series EXTRA WHITE y EXTRA BLACK poseen una intensidad de color SUPERIOR debido a su mayor concentración de óxido de cinc en el esmalte, y confieren al espacio donde se utilizan mayor factor de luminosidad que los tradicionales esmaltes de blancura azulada o pálida en el caso de los blancos, y una mayor pureza de color en el caso de los negros.

Our items in white and black colour of the EXTRA WHITE and EXTRA BLACK ranges are really intense due to a higher oxide zinc concentration in enamel. In the areas used, these products offer a greater luminosity than traditional bluish or pale whiteness in the case of white, and greater colour purity in the case of black.

## PERFILADO PERIMETRAL · PERIMETRAL PROFILING

Todos los productos tienen un acabado especial ya que pasan por un proceso mecánico de PERFILADO PERIMETRAL y cepillado del borde, con cuyo resultado se consigue un ángulo prácticamente sin bisel, confiriéndole un aspecto que recuerda el rectificado, así disimulamos las juntas y también ahorramos material de rejuntado.

All our tiles have a special finishing as they pass through a mechanical process called PERIMETRAL PROFILING and brushed of the edge, the result is a right angle, almost without any bezel which confers a look like the rectified. Joints can be minimal and it also helps to save grouting material.

## ANTISLIP

Todos los productos ANTISLIP de UNDEFASA han obtenido un resultado superior a RD45 en las pruebas de resistencia al deslizamiento según la norma UNE ENV 12633:2003. Ello los hace aptos para su colocación tanto en espacios públicos como en exteriores.

All UNDEFASA products named ANTISLIP have obtained more than RD45 test result slip resistance according to UNE ENV 12633: 2003 standard. This makes them suitable for in both public areas and outdoors too.
